PROFESSIONAL BIO

Odis D. James III is the founder and CEO of 4 Data Points Academy, a real estate investing education and mentorship company, and a licensed real estate broker in California and Georgia. He made his first million starting with less than $500, and today he teaches investors to evaluate every deal with four data points: cost to buy, cost to rehab, after-repair value and income potential. Odis is the author of seven books, published on Amazon in nine editions including Spanish, and the creator of Empire, a done-for-you program that builds the systems behind a business, and VentureU, his international business retreats.

FOUR MAJOR WINS

1. **Nine published books on Amazon.** Seven titles on entrepreneurship and real estate investing, plus Spanish editions of two.
2. **Sold-out international business retreats.** The first two VentureU retreats both sold out.
3. **A mentorship built on support.** Our real estate investing mentorship offers the highest level of support: live classes every week, one-on-one help, and access with no end date.
4. **My first $1 million, started with less than $500.**

Also worth mentioning: launching the 4 Data Points Academy app on iPhone and Android, and building the Empire and AscendU programs.

FOUR CHALLENGES AND THE LESSONS LEARNED

1. **My first group investment outside my immediate circle went bad, and we defaulted.** It was a very hard lesson in who you partner with and how a deal is structured before money changes hands.
2. **Chasing outcomes instead of building systems.** I learned that systems and processes are what produce results consistently. Focusing only on the outcome doesn't.
3. **Focusing on the business and neglecting the mental side of entrepreneurship.** Mindset and self-image drive execution as much as strategy does.
4. **Coming off the road to spend more time with my son.** It was the right decision and a benefit to me, but it was a major financial setback I had to work through.

Entrepreneurship is setback after setback after setback. The win is continuing to execute through them.

BUSINESS, BRAND AND PROJECTS TO HIGHLIGHT

- **4 Data Points Academy:** real estate investing mentorship (Group, One-on-One and Jumpstart Business Premier). 4datapoints.com

- **Empire:** we plan your business first, then build the marketing, workflows, automations, automatic follow-up and AI agents behind it. 4datapoints.com/empire
- **VentureU:** international business retreats. ventureu.live
- **AscendU:** personal development and self-image for entrepreneurs.
- **Books:** seven titles on Amazon, including *Starting From Zero*, *No Guardrails*, *No Shortcuts*, *One Decision From Glory* and the *Real Estate Investor's Field Manual*.
- **The 4DPA app:** free on iPhone and Android, with starter courses and deal analyzers.

FOUR TOPICS TO DISCUSS

1. **What it actually takes to succeed** as an entrepreneur or real estate investor.
2. **Why people don't execute.** The bar is set so low that most of the time just showing up is a win.
3. **Empire** and what we're actually building for entrepreneurs.
4. **Our international business retreats:** what happens when entrepreneurs get out of their environment.
